

NAVARSYSTEMS

WELCOME TO THE CONNECTIVITY

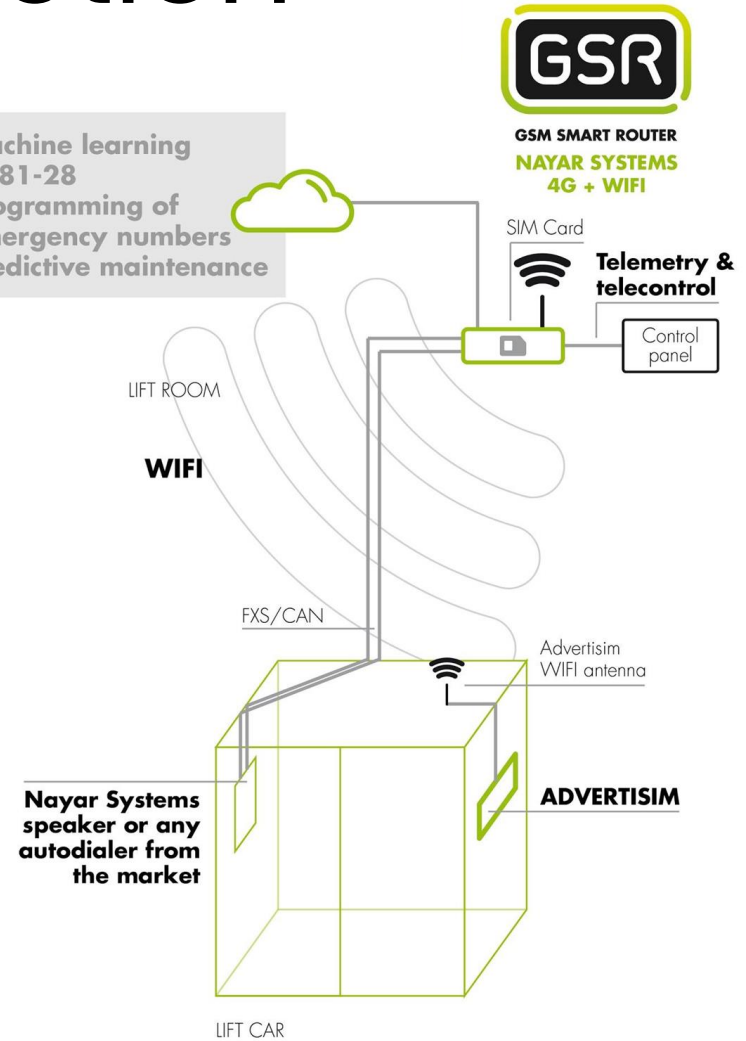

# Machine Learning & Elevators

# Introduction

- IoT
- Big Data
- Artificial Intelligence
- Cloud Computing
- API's

- Machine learning
- EN81-28
- Programming of emergency numbers
- Predictive maintenance

# What is it about?

- Elevator connected to the Internet
- Data Collection and local filtering
- Upload data to a Smart Data
- Apply Artificial Intelligence algorithms
- Get results

# What is necessary?

- Hardware IoT
- Cloud Computing
- Artificial Intelligence platform
- Show value to the customer

# Why?

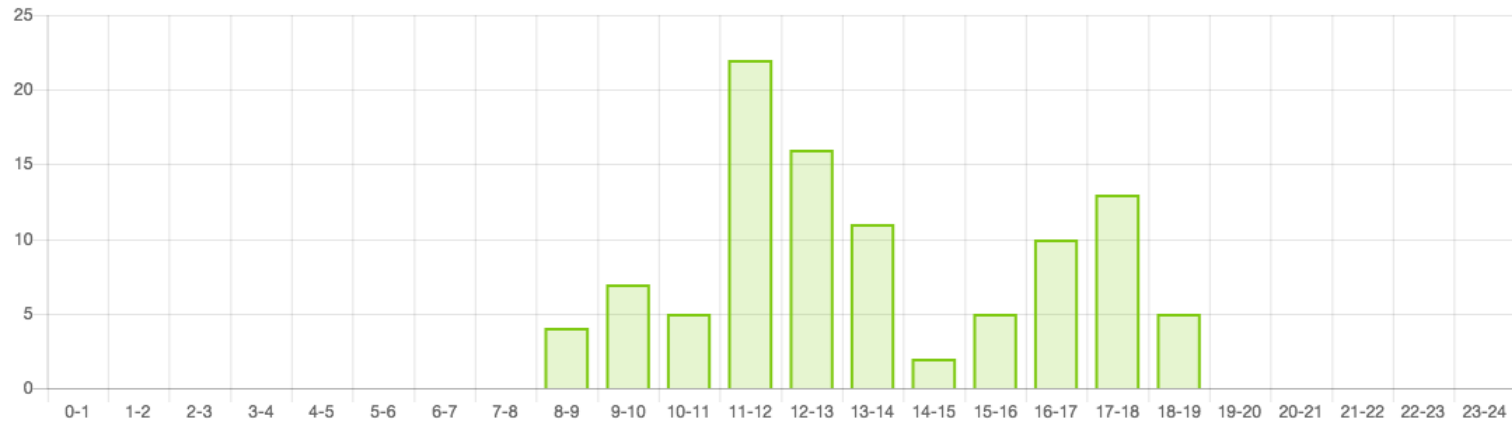

- Increase security
- Digital Trends
- Improve the service
- Improve competitiveness
- New business case

Estimate the ideal time for maintenance

The best time for maintenance is between 2pm to 3pm

Estimated use of elevator by time slot
